...the indie Red digital  
cinema gurus in Asia

# Kanda River Productions SERVICES & RENTAL PRICE LIST (Mar 2010)

Specializing in 2-D 4K+ organic cinema vérité at 24 frames per second with the highest production values and small crews—using a Red Digital Cinema pipeline. From capture with a Panavision lens to rapture at the film or 12-bit DCP projection, we know the workflows and logistics. We make digital films happen.

Kanda River Productions, run by filmmaker Dan Carew, is an indie film production company focused on digital cinema production and post-production. With one of the first Red cameras in Asia (#1304), we are pioneers and thought leaders in shooting RAW on full-sized digital sensors and high-end 35mm lenses and camera gear. KRP has provided Red gear and consultancy to a small Hollywood movie by an A.S.C. member shot in China, shot their own short film on Red (in 4 international festivals), shot numerous music videos and lectured on digital cinematography at HKAPA. KRP provides digital cinema services, support and training to filmmakers making the transition to Red: on Red camera, gear, workflow, data wrangling, color-grading, post-production, DCP, and LTO backup. While not a rental house, we do rent out gear to trusted friends and partners. We have and know the latest and best Red gear for indies (Mysterium-X Red, Epic, and Red Pro Primes, Red Rocket; Element Technica, DedoLights, Cool Lights, Tangent Wave, Euphonics control surfaces, HP Dreamcolor, EasyRig, Matrox MXO2, etc.) We are gurus on tech: e.g., iPhone/iPad (apps and for dailies), Web 2.0 cloud collaboration, and online distribution. Please contact me directly at dan.carew@kandariver.com or +852-9099-1329 to discuss. thanks! Dan Carew (Hong Kong) <http://www.imdb.com/name/nm3472193/> blog: <http://indie2zero.com/>
